

Stephen Remi Adebambo

+1 (437) 410-8399 | sradebam@uwaterloo.ca | linkedin.com/in/stephen-adebambo | github.com/badheuristic | Waterloo, ON, Canada

SKILLS

Programming: Python, JavaScript/TypeScript, SQL, C

Technologies: React, Node.js, FastAPI, RESTful APIs, PostgreSQL, MongoDB, Docker, Git, Jest, Pytest

Professional: Agile/Scrum Methodologies, Cross-Functional Communication, System Documentation

EXPERIENCE

Aiivon Innovation Hub

Jul 2021 – Sep 2021

Software Developer Intern

Abuja, Nigeria

- Collaborated cross-functionally with designers in an Agile environment to build and overhaul internal tools and fintech applications, increasing user retention by 10%.
- Refactored legacy codebases to introduce modular patterns, reducing code volume by approximately 6% and extensively documenting system designs for long-term maintainability.

The Electoral Hub

Feb 2025 – Mar 2025

Data Analyst/IT Officer

Abuja, Nigeria

- Engineered Python data pipelines to process complex political datasets, effectively replacing manual workflows with reliable automated systems.
- Automated data processing and workflow operations, reducing report turnaround times by over 90% while ensuring strict data accuracy and documentation standards.

Multichoice Nigeria

Jul 2022 – Sep 2022

Network Operations Intern

Abuja, Nigeria

- Executed proactive troubleshooting and monitoring of server infrastructure, interacting closely with middleware engineers to ensure data integrity and identifying potential issues on 11 occasions.
- Collaborated effectively with senior technicians and independently resolved roughly 5 escalated technical incidents, prioritizing independently in a fast-paced environment.

Independent Tailoring Business

Mar 2026 – Present

Bookkeeping Assistant

Remote

- Developed an automated spreadsheet system utilizing formulas to record and reconcile monthly costs, profit, and expense metrics, replacing error-prone manual bookkeeping.

PROJECTS

CityMind | *React, FastAPI (Python), SQLite, Pytest, LangGraph* | [GitHub](#)

Mar 2026

- Built a governed data gateway and RESTful API layer using FastAPI that structurally enforces role-based access control and maintains meticulous audit logs for querying and validation.
- Developed a custom React frontend to interface with the backend, utilizing Pytest for rigorous unit testing to ensure data privacy enforcement and structural integrity.
- **Award:** Won 1st Place, City Data OS Problem Statement, FCI x LangChain Hackathon.

InfraLens | *NextJS (React), FastAPI, Snowflake, Docker, Terraform* | [GitHub](#)

Apr 2026

- Developed a full-stack automated pipeline to ingest raw operational metrics, utilizing a NextJS frontend with WebSocket integration to display real-time infrastructure progress.
- Engineered scalable backend workflows using Python and FastAPI that dynamically generated declarative Terraform configurations to rightsize underutilized cloud resources.
- **Award:** Won the MLH Best Use of DigitalOcean Award at ConHacks 2026.

MazeEnv | *Python, Pandas, NumPy* | [GitHub](#)

Mar 2026 – Apr 2026

- Developed a scalable environment to benchmark temporal difference algorithms, analyzing variance and behavioral differences across complex datasets.
- Engineered an optimized data structure utilizing O(1) nested Python dictionaries, achieving a 100x computational speedup over Pandas DataFrame implementations.

EDUCATION

University of Waterloo

Waterloo, ON, Canada

MEng. Electrical and Computer Engineering (Current GPA: 87.33%)

Expected Apr 2027

- **Relevant Courses:** Algorithms and Complexity Analysis, Intro to Artificial Intelligence, Intro to Machine Learning, Master of Engineering Project

Nile University of Nigeria

Abuja, Nigeria

BSc Computer Science (First Class Honours, CGPA: 4.76/5.0)

Sep 2019 – Sep 2023
